

Wickberg Group, inc. was founded on the belief that construction can be SUCCESSFUL, HONEST and FUN for everyone in the process.

Our goal is to BUILD...

relationships, projects, friends...

through a commitment to excellence, honesty, transparency and value. We want you to call us whenever you have a construction need, question, or problem. With generations of experience, we can offer expert solutions, opinions and advice.

Let us take all the various pieces of your construction puzzle and put them together... It's what we do!

Our core values...

- Develop relationships with clients who seek value and honesty.
- Pursue excellence in our endeavors.
- Provide "open-book" accounting of our client's funds.
- Provide a safe work place for all employees.
- See that our operations minimally impact the environment.

Comprehensive Construction Services

Choosing the right team for the design and construction of your project is an important key to your success. We provide construction services that are honest, competent and value driven.

TRANSPARENT CONSTRUCTION™

Imagine a construction project where:

- you benefit from expert construction experience during planning, design and before construction starts...
- the Contractor is looking out for your interests...
- you know how and where your money is being spent and at the end...**get some savings back!**

Our **Transparent Construction™** process provides you with a transparent, open book review of all costs and documentation for the project.

We provide you with the cost of the work and our fees before we start, and track the cost on a monthly basis. When the project is complete, we return savings to you!

This allows you to make “real time” fiscally responsible decisions with your money. We provide a complete “open book” approach to the entire construction process.

GENERAL CONTRACTING

We are experienced general contractors and provide traditional construction services such as competitive bid, construction management and design-build. The enhanced scope of our services include:

- value engineering
- quality control
- scheduling
- advanced procurement
- financial analysis
- constructability reviews
- project controls
- documentation, etc., all at no extra cost to you.

CONSULTING

Not sure about the cost of your project? Want a “second opinion?” Interested in “Sustainable Construction” or “Green Buildings?” Have a question about a past, current or future project? We have generations of experience and can offer you our expertise, opinion or advice on any construction need. We can assist you with feasibility studies, conceptual budgeting and estimating, preliminary milestone scheduling, Owner Representation, constructability reviews, permitting and zoning assistance. **Let us take all the various pieces of your construction puzzle and put them together... It's what we do!**
